Types of Users

1) Anonyms User: can submit the form
2) HR Coordinator: Will Review the form and accept/reject
3) HR Manager: Will Review the form after the acceptance of HR Coordinator and he can accept/reject.

Submission Form (This will be available for public and anonyms Users can submit)

1) Name
2) DOB
3) Gender
4) Nationality
5) CV attachment

Administration Dashboard (Accessible by HR Coordinator and HR Manager)

All submitted forms should show up to HR coordinator. And after he takes an action (Accept/Reject) it will disappear. In case of approval. It will be moved to another step which is HR manager.

The HR manager should see the forms only after the HR coordinator approval. And he can (accept/reject). In case he took any action then it will be disappear from his screen.

Dashboard Reports

Create the following report which will be available only to the HR Coordinator

Form Number	Name	DOB	Gender	Nationality	Attachment	Form date	HR Coordinator Status (Accept/Reject)	HR Manager Status (Accept/Reject)

API

Create an api that we can use on mobile application to provide the functionality of form submission. The response should be JSON. And share the postman file.
